

# ThermaLite™ 1470 Laser Systems

*Clinically Superior... Economically Smart!*

The **ThermaLite™ 1470 Laser System** offers the latest advances in diode technology.

The superior 1470 wavelength targets interstitial water and has up to 1500 times greater water absorption than the other popular lower wavelengths. Operating at lower energy densities results in less bruising, less swelling and virtually no postoperative pain.

The **ThermaLite™ 1470** is FDA approved for a multitude of applications including laser lipolysis.

Choose from 7, 14, 17 or 30 watt designs.

The **ThermaLite™ Nano** makes 1470 technology more affordable and portable.

*Total Vein, your partner in delivering quality and affordable healthcare.*

# Total Vein Multi-Specialty Laser Systems

Available wavelengths:

- 1320 nm
- 1064 nm
- 980 nm
- 940 nm
- 810 nm
- 532 nm

Total Vein offers a complete line of multi-specialty diode laser systems. The lasers are approved for vascular surgery, gynecology, general surgery, urology, plastic surgery and dermatology.

All lasers come complete with a one year warranty; additional year warranties are also available.

All of the TVS laser systems are compatible with both single use and reusable laser fibers.

# Total Vein Laser Systems for Vascular and Cutaneous Lesions

Available wavelengths: 940 nm  
532 nm

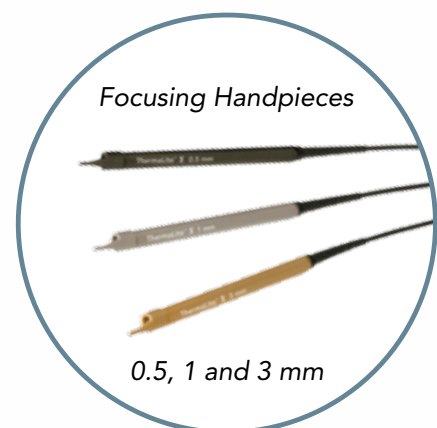

Total Vein is pleased to offer two laser systems for vascular and cutaneous lesions.

The 532 wavelength has been proven effective in treating vascular and cutaneous lesions over the past 25 years. This wavelength targets red vessels and is highly effective for the treatment of spider veins, telangiectasias and lentigines.

The 940 wavelength is best for treating spider veins on legs and darker complexions. It is also highly effective for treating telangiectasias and spider nevi.

Both systems use focusing handpieces with spot sizes of 0.5, 1 and 3 mm.

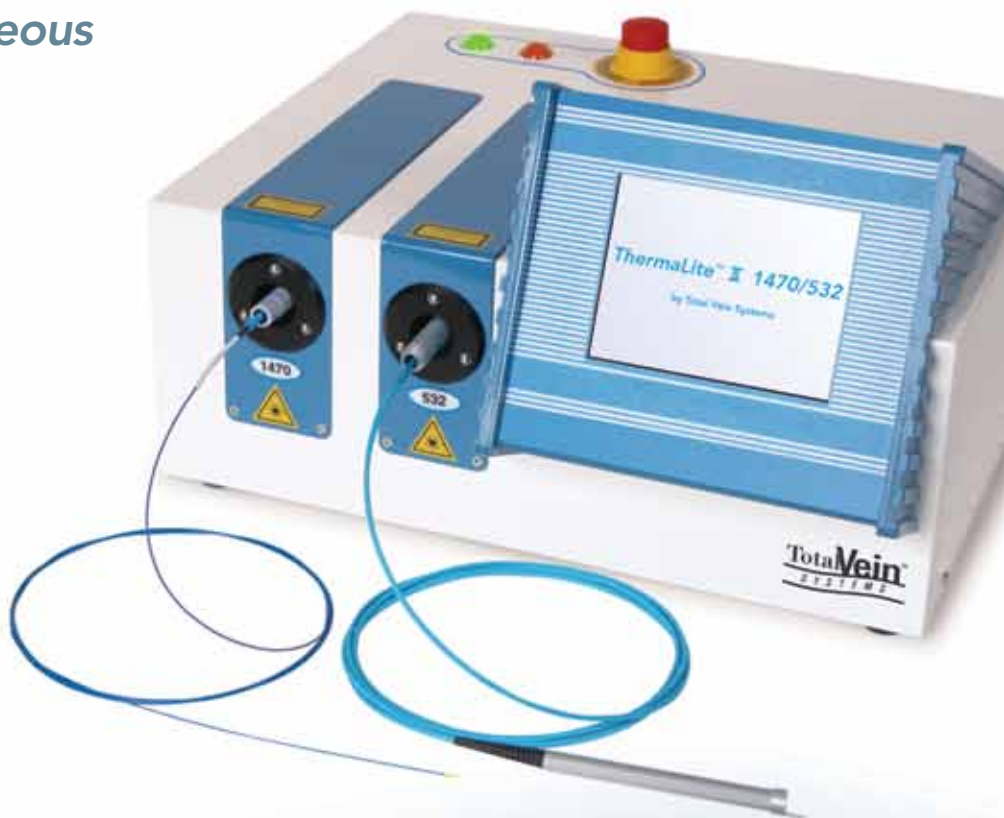

# ThermaLite™ II

The Perfect Match for  
Surgical and Cutaneous  
Treatments

## Standard Combinations\*:

1470/940 nm

1470/532 nm

The **ThermaLite™ II** Dual Wavelength Laser System combines the Revolutionary 1470 wavelength with either the 940 or 532 wavelength.

The 1470 laser features a standard SMA 905 connector that is compatible with Total Vein's ThermaShield™ fibers. ThermaShield™ fibers are available in 400, 600, 800 & 1000 microns in both single use and reusable designs.

Both the 940 and 532 lasers utilize focusing hand pieces that have 0.5, 1 and 3 mm spot sizes.

The **ThermaLite™ II** is the perfect way to expand the types of treatments you can offer your patients.

\*Dual systems available in any wavelength combination.
